

Today is

Dear
How will we live and what will we do
in the year 2000?

Why wait to find out - see for yourself at
Century 21 Exposition, on 14 acres of
ground with a \$10,000,000 investment,
Seattle, Washington, April 21 - October 21,
1962.

A trip to the top of the 550-ft. Space
Needle, to the restaurant and observation
deck, will give you a 360-degree pano-
ramic view of Puget Sound, Mt. Rainier, the
Olympics and the Cascade Range.

87, 59, 38

Scientists developing plans for the spectacular United States Science Pavilion.
It is a completely new experience in the "Spacearium", where the galaxies are
viewed as if from a rocketing Space Ship.

The glorious projection into the
future is the first Exposition of
its kind and will take you on
a tour of "Man's Environment
in Century 21", against a back-
drop of the contemporary scene.

Out and cultural forecasts
feature the latest advances in
techniques and media. "Lit in the Space Age" is the theme of this 2-acre
Exposition Area. Eleven acres of Century 21 are devoted to a continual interna-
tional parade of performing arts, sports and spectacular events, in the
World of Entertainment. One sees the showcase of the world's foremost
performers. A 3000-seat concert hall, a 5,500-seat arena and a 12,000-
seat stadium and an 800-seat theater present a continuous schedule of
outstanding entertainment.

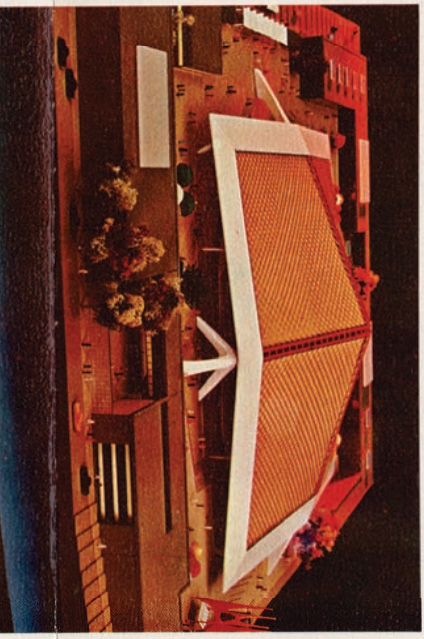

The World of Science is upheld on an interna-
tional basis with many of the world's leading
scientists. Eleven acres of Century 21 are devoted to a continual interna-
tional parade of performing arts, sports and spectacular events, in the
World of Entertainment. One sees the showcase of the world's foremost
performers. A 3000-seat concert hall, a 5,500-seat arena and a 12,000-
seat stadium and an 800-seat theater present a continuous schedule of
outstanding entertainment.

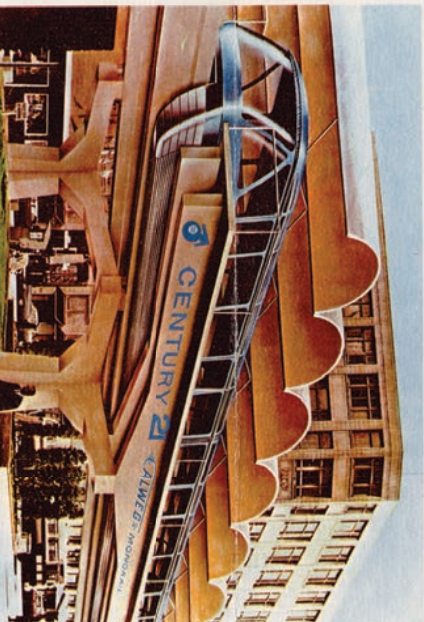

The World of Century 21, a
3-level, glass-enclosed
Coliseum (as high as an 11-
story building), covers 4 acres
of an 8 1/2-acre park. This
startling departure in ex-
hibition explores life in
the year 2000 A.D., with
accent on the materials
and machines that will
influence work and play
and outdoor living. A "float-
ing city" houses unique displays in a multi-level panorama
of tomorrow's products.

"Boulevards of the World," a pattern of streets and avenues
lined with colorful shops, gay bazaar, bars and restau-
rants of participating nations,
create an atmosphere of
international travel as
the visitor moves from
one World of Century 21
to another.

In the World of Commerce
and Industry, participants
present a complete picture
of the world's latest and
most startling developments in every sector of commercial
and industrial ingenuity. The buildings surrounding the
Coliseum display achievements of other nations since the
dawn of the Space Age. Exhibits are grouped by nation of
origin rather than by category of goods and merchandise.
Another area features the achievements of private industry.

Transportation of tomorrow is in use today as Monorail cars
whisk passengers from the heart of Seattle to Century 21
in 96 seconds.

Parking and lodging have
been planned with great
thought and foresight.
