THE WYPL EXHIBITION FROM CAPTIVE DALLON A DARTER BY A MUSE ABOVE THE EARTH

## Russ Satellite No Cause For Alarm--Eisenhower

AT REST: The Soviet government in Moscow today made public this official photograph showing the earth satellite, Sputnik I, resting on a three-legged pedestal. It shows the baby moon has four antennas.—A. F. wirephoto by radio.

## U. S. Could Have Had First One, Says President

By Associated Press.

WASHINGTON, Oct. 9.—President Eisenhower assured the nation today that he sees not one more iota of reason for concern over national security as a result of Russia's successful launching of an earth satellite.

Mr. Eisenhower also said in a formal news conference statement that the United States could have beaten Russia to the punch and put up a satellite before now, by merging the satellite and missile programs.

But the President said this would have been "to the detriment of scientific goals and military progress."

Mr. Eisenhower's session with newsmen was devoted almost completely to the satellite question and the subject of missiles.

All that Mr. Eisenhower said added up to the idea that in both fields the United States is going ahead just as it has planned all along, with no unusual speed up now in the light of the Russian satellite achievement.

### Satellite Due in December

In a prepared statement, Mr. Eisenhower announced that the United States plans to launch test satellites in December.

Mr. Eisenhower also said the first fully instrumented United States satellite will be launched in March of next year.

Mr. Eisenhower was asked whether he saw any possi-

ble, Maryland, that the Navy actually could launch a satellite at any time, Mr. Eisenhower said Russia must have more information on that than he does.

(U. S. to launch test satellite in December, says Eisenhower. Page 2.)
