

Digging the Lake: PSMHS Heritage Trunk

History

Geography

Underwater Archaeology

We are pleased to offer our second heritage kit for classroom use: “Digging the Lake” introduces students to the varied themes that make up the history and geography of an urban lake, using the Lake Union Underwater Archaeology Project as a focus.

Photos, videos, maps, suggested activities, and resource materials allow elementary and middle school students to learn about methods of historical research, including the use of primary and secondary sources and the role of underwater archaeology. The kit also includes diving equipment that children may try on.

Both this and our first Maritime History Kit are available to rent through the Museum of History and Industry’s Education Department for \$30.00 for a two-week period. To arrange to rent the kit, go to MOHAI’s Portable Museum Request Form on their website.

For more information, contact PSMHS at admin@pugetmaritime.org.
